

### Grumman F4F (alias Martlet) Wildcat

7815 were built  
 First flight 1939  
 Bought by France and Britain in 1940  
 max. speed 538 km/h  
 Difficult to fly and didn't forgive  
 any mistakes

Recommended engine OS 15FP or other 25cc engine  
 With a .10 and 2 lines it's a nice trainer  
 It will accept a 20, shorten the nose by 2cm  
 and put fuel tank on the opposite side of  
 fuselage. But you will have to tame the beast.

weight complete 660gms  
 lines .012 14m30  
 All our youngsters managed a good score on their  
 first competition with this plane

Be careful: The Zero will outturn the Wildcat

be careful for your eyes
