

## Navy Carrier Society - .15 Carrier Rules

### .15 Profile Carrier

(Denver Rules) The intent of this event is to provide a Navy Carrier event which uses simpler, smaller, lighter and easier to build models as compared to the current AMA Profile Carrier aircraft. In pursuit of this goal, .15 Profile Carrier models are limited to moveable throttle, hook and elevator only. No moveable flaps, ailerons, leadouts, rudder, etc. are allowed. While there are no scale points awarded in this event, the model must have a military paint scheme and national markings. As a result of the lack of scale bonus points, originality in model design is welcomed.

AMA Official Profile Navy Carrier rules apply except as follows:

Engine:0.1525 cubic inch maximum displacement.

Flying Lines:Minimum line diameter:

Stranded: .012 inch

Solid:.010 inch

Line length:

52 foot - 52 foot 6 inches

Scale Bonus Points: None

Minimum Wing Area:None

Maximum High Speed:70 mph, faster speeds are allowed but 70 mph will be used for scoring.

Moveable components:Throttle, hook and elevator only.

Number of laps for

High & Low Speed:8

Pull Test:25 pounds
